Value Soft Solutions

Microsoft CERTIFIED *Global Partner*

Build Enterprise Mobile Applications on the Fly
Iphone, Ipad, Andriod, Windows Mobile, Blackberry

ENTERPRISE MOBILE APPLICATION CONSIDERATIONS

Enterprise mobile application developers and business leaders face native or web choice issue when working on new mobile applications. Which approach should they take?

A native app is downloadable from an online app store and takes advantage of the powerful processors and abundant memory offered by today's smartphones and tablet computers. A web app, on the other, runs on back-end servers and is accessed by the user via the web browser on their device.

Both approaches have their drawbacks. In the case of a native app, the problem is that developers need to create a slightly different version of the app for every mobile platform and device on which they intend it to run. A browser-accessible web app, by contrast, can be accessed from any device with a browser, but this approach makes some sacrifices in terms of performance and usability.

In enterprise environments, hybrid apps will make up 60 percent of all mobile apps, followed by web apps (30 percent). Native apps only make up 10 percent of mobile apps, according to Gartner.

WEB AND NATIVE MOBILE APPS WITH MOBILE APPLICATION STUDIO

Our Mobile Application Studio is the most feature rich form builder. You can build contact forms, feedback forms, online surveys, invitations and registrations on web and mobile browsers as well as on native applications.
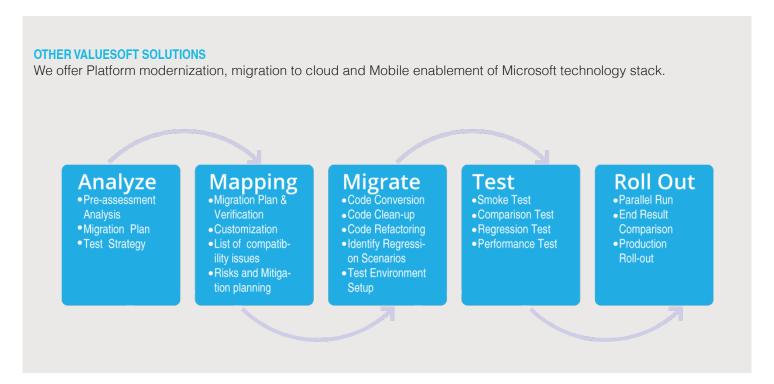

Features Supported
- Form controls such as buttons, text boxes, check boxes and drop downs.
- Easy to plugin with multiple layouts
- Standard and dynamic validations
- Database integration
- HTML5 support
- Compatible with mobile and web

Benefits of mobile app studio
- Customize the forms in a few clicks
- No coding needed
- Spam verification
- Easy to deploy

OTHER VALUESOFT SOLUTIONS

We offer Platform modernization, migration to cloud and Mobile enablement of Microsoft technology stack.

Analyze
- Pre-assessment Analysis
- Migration Plan
- Test Strategy

Mapping
- Migration Plan & Verification
- Customization
- List of compatibility issues
- Risks and Mitigation planning

Migrate
- Code Conversion
- Code Clean-up
- Code Refactoring
- Identify Regression Scenarios
- Test Environment Setup

Test
- Smoke Test
- Comparison Test
- Regression Test
- Performance Test

Roll Out
- Parallel Run
- End Result Comparison
- Production Roll-out

Migration to Cloud

Analyze	App & Data Migration	Customization Architectural changes New Functionality	Integration	Testing

Other Cloud Services
- Cloud Strategy & Planning Advisory
- IAAS Management
- PAAS Management
- New application development

Mobile Enablement Process

Analyze	UX design	Customization	Integration	Testing

Other Mobile Services
- Iphone & Ipad application development
- Android application development
- Windows Mobile development
- Blackberry application development

ABOUT VALUESOFT

ValueSoft is the preferred Microsoft partner for technology stack migration to the latest platforms, cloud and mobile. We have 10 years of experience helping Tier1 brands with technology modernization, mobile enablement and application integration solutions. We have migrated 10 Million lines of code for our customers.
